SNOW PLOUGH SBS/SBB

Two models:

Straight-cut SBS is well suited for plowing in yard areas.

Butterfly SBB throws snow on both sides, well suited for road opening.

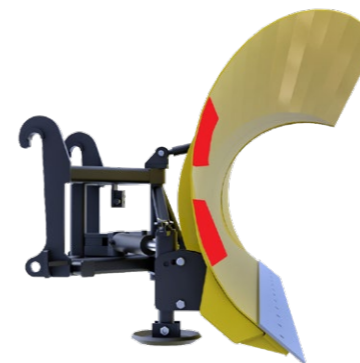

Snow ploughs options:

- Two cylinders for turning the plough horizontally. Shock valve protects the system in case of collision
- Curved cone-shaped blade.
- Adjustable floating blade follows the profile of the ground, it scrapes very effectively hard compressed ridges of snow and ice by using gravity.
- Strong ribs on the backside of the blade keep the structure firm and steady.
- Adjustable support legs

Cutting edges in 3 alternatives:

- Perforated cutting blade, hardness 500 HB
- Flat-bottom cutting edge, hardness 600 HB
- Dented cutting edge, hardness 500 HB
