

GRAVEL BUCKET GS/GV

Transmission steel sheets

Hytera GS (straight cutting edge) and GV (V-shape) gravel buckets are made for hard work. Both models are available with teeth option.

Made to last

Made of special hard steel for demanding work. Straight and V-cutting edge made of hardness HB500. The front sides, front corners, heel and bottom are reinforced by HB 400 special steel, which ensures a very long life. The rear blade for ground leveling is standard.

Protection and connectivity

A-shaped guards protect the connection hooks from big stones. Available with both wheel loader quick coupler and pin connectors. Customized designs are also available.

HYTERA GRAVEL BUCKET GS/GV

Hytera Gravel Buckets are designed for dairy soil treatment. Available in two different models, one with straight cutting and the other with a V-shape edge.
