HIGH TIP BUCKET HTB

Hytera HTB central cylinder model is suitable for dry, grainy and loose material. The side cylinders model is excellent to handle wet and adhesive material. For example, many operators prefer central cylinder model when loading wood chips, in addition all the buckets for peat production are manufactured in central cylinder version

Robust body – Side plates 6-10 mm
Edge plate HB500, 20-30 mm
Option for bolted wearplate

Grids are in two rows for allowing good visibility

The HB400-made turning frame is protecting the cylinders. Frame's open design prevents material build up.

The cylinders at 45 degrees allows user to lifting at idle and end stroke dampening and retraction cushions protects the cylinders. Available with wheel loader quick coupler and pin connectors.

MODEL	HTB20-230SC	HTB30-250SC	HTB40-250SC	HTB45-275SC	HTB50-300SC
