

# MULTI PROCESSOR MP

MP Multi Processor product range is designed for professional to be used in many different tasks. Processor range have rotation and can use many different jaw options for different tasks. Demolition productivity is ensured by changing optimal jaw according to need. Multi Processor's have hydraulic rotation and high speed valve in cylinder to speed up the work time.

**A Jaws**  
For building foundation demolition

**S Jaws**  
Task with reinforced concrete structures, jaw has long cutting blades

**M Jaws**  
Steel cutting jaw: fast, light and strong steel cutting tool

**D Jaws**  
Versatile jaw for primary and secondary crushing. Jaw's can have crushing teeth, pulverising pads or wood cutting blades attached

### Benefits of MP range

- Very strong structure
- Fully protected cylinder with tube shield
- Quick speed valve
- Good power/weight ratio
- Versatile due of many jaw options
- Can have one or two hydraulic motors in rotation
- Versatile D-jaw for primary and secondary crushing
- MP20, New MP series tool where main frame design protects hose and cylinder
- MP20, The jaw bearings are maintenance free bearings to reduce needed greasing points

# Robi<sup>®</sup>

## MULTI PROCESSOR MP

Robi MP Multi Processor is demolition professionals multi task tool. Different jaw options provide large range of applications. Productivity is achieved by powerful cylinder with high speed valve and Robi-Rotation.
