## PULVERISER RP

### Robi pulverisers are contractors' basic tool for demolition

Robi pulverisers are made for professional use and they are excellent choice for pulverising on the ground. They are proven technology and are extremely durable and reliable accessories for the excavator.

Pulveriser fines down excellently demolition material between its large pulverising plates. Pulverisers are built from high quality, wear resistance materials, which are protected with hard welding layer. Because of its simple structure, maintenance work is reasonably easy to do.

### Non rotating Robi- pulverisers are a great choice for customer's demolition and pulverising works when following advantages are taken into consideration:

- Easy to use
- Good design for pulvering on the ground.
- Robust structure
- Great performance is a result of a large cylinder and a good design of teeth which improves penetration
- Quick-Speed valve included in RP42
- Easily replaceable wear parts
- Reversible cutting blades
- Well protected cylinder
- Reasonable maintenance cost because of simple and reliable structure build

MODEL	RP30	RP42
Carrier weight (t)	18-28	24-42
Operating weight (kg)	1800	3050
Max jaw opening (mm)	870	1160
Max cutting force (kN)	1350	2330
Max crushing force (kN)	770	1220
Cylinder max (bar/l/min)	320/180	320/250
